Dear Dr. Masaru Emoto and friends from Hado Institute!

Thank You so much for publishing electronic book The Message from Water for children.

I printed one book for my family, another copy I'll bring to my daughter class during a parents reading day. She is at 2nd grade in elementary school in Orlando. Katya is 7 years old, she loves Dr. Emoto work, she saw with me a Power Point presentation file in Spanish Mensaje de Agua, somebody created it 2 years ago and sent it to me. I translated it into Russian. I will share the information about this book with all our friends too.

I left Russia in 1983, because married Cuban men. We lived together in Cuba (9 years), Canada(6 years), USA, Florida, Orlando since 1998. We have 3 kids, born in each country, 2 boys and 1 girl.

Katya and I started to harmonize water recently. I watched 2 Russian movies by Saida (Part1, part 2 where Korotkov and Emoto talk) about water. They say to get water from a tap and live it for 24 hours still, stirring occasionally. We got pictures of dolphins and whales and wrote messages to water in English and Russian. We harmonize water this way and drink it after 24 hours, give it to our cats. We play beautiful meditative music with sounds of dolphins and whales in a kitchen too.

I am sharing with you pictures of our water corner in the kitchen where we do it. We will put same messages to water on a bottom of each jar too, this is the way you do it at Hado Institute experiments as shown in the book.

I am sharing in the attached files messages we wrote to water. If there is a time to answer us, would you, please, write to us if me and my daughter are harmonizing water the right way.

Thank You so much again. God bless Us all.

We love Us together.
